"Houseplant Twins: Telling Pothos from Philodendron"

By Marilyn Sallee, Tarrant County Master Gardener

They both make robust houseplants well suited to indoor conditions, and often sold mislabeled as the other. But telling Pothos (*Epipremnum aureum*)

Heart-leaf

from Heart-leaf Philodendron (*Philodendron hederaceum*) requires a close look and some botany knowledge. And knowing which you have tells you important things about care and propagation.

Pothos

Identifying traits of each plant are depicted in the table below:

	Pothos	Philodendron
Stem	Distinct ridge	Smoothly round
Petiole (leaf stem)	V-notch or grooved	Round
Leaf sheath	Short, almost unnoticeable, easily shed	Long, usually stays attached
Leaf thickness	Thicker, crisper	Thinner, more flexible
Leaf shape	Point spade-like	Point slender, tapered
Mature stem	Deep green	Brownish
New Growth	Pale green, shiny-glossy	Green, satin-matte, may have a reddish to olive tinge

Whichever you have, if you treat it right and get it to vine, you can encourage their distinctive traits - Heartleaf Philodendron is also called Velvet-leaf because a mature vine develops a velvety texture. And a true mature Pothos in a good location may develop a split-leaf trait.

While most are commonly grown in hanging baskets or small pots in the home, both of these plants are climbers and can be grown on moss covered posts, support columns or a trellis. I have a friend who has trained her Philodendron on a small triangular pergola to form a five-foot tall "Christmas Tree" in her living room. She repots it every two years to keep it lush and growing.

If you have an idea or would like to contribute to the newsletter, please contact Jackie Heidinger jackieheidinger@verizon.net

Houseplant Twins—continued

If allowed to climb or vine, they can easily reach across the room, or climb a tree in warm climates. You can give it small hooks or supports to cling to and make the vines climb walls or even across windows. Lay the stems on the supports to train it. I have another friend who grows her Pothos from a pot in the dining room window up to the ceiling and around the plate shelf into the living room and kitchen. For this technique in action, check out Katherine Hepburn's office in the movie "Desk Set".

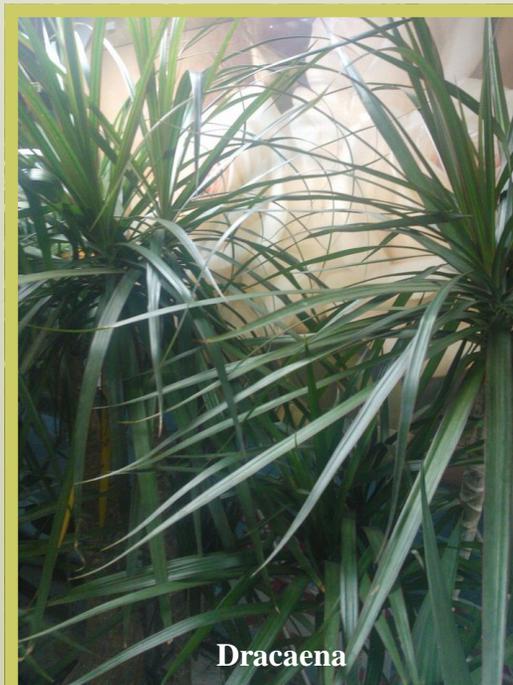

Propagation:

Both vines will form new roots along the leaf-joint, and can be started in water. But for good development, start new plants by wrapping the leaf node in sphagnum or pinning into a good rooting medium. The best time to propagate is in mid-winter. January-February-March while the plant is dormant allows the roots to develop best. Also, tip cuttings encourage the parent plant to branch out and become thicker and fuller; root tip cuttings in moist perlite.

President's Message

Hello Fellow Gardeners,

Now is the time of year when we have totaled up our volunteer hours (They are due by Oct. 31) and reflect on where the time went and the various activities we were a part of.

I want to share some of the photos that have recently been sent to me about MG projects and field trips. I know that there are a lot of events going on out there, so send me your photos for the newsletter.

Each year Gay Larson, project lead at Union Gospel Mission, honors a Master Gardener volunteer. This year she had two – Mary Jane Goad and Joe McCreary. UGM volunteers meet Mondays at 9 a.m.

“Mary Jane has been faithful to do whatever is needed in landscaping chores for years. Painting benches, pulling weeds (she is great at this) seeing things that need to be done and always willing to go the extra mile. Lately, she offered to make the coffee and make sure that we have snacks for the Master Gardeners and for the classes that we give to the residents. I appreciate her calming personality and willingness to be helpful,” Gay explained.

“Joe is a retired dentist . . . he gets the trash duty, spraying Roundup, removing soil, revitalizing old used trellises, sprinkler repair, donating bird bath then having to water seal it, pruning with chain saw, pruning trees and many other landscaping jobs that continue to make UGM the best project in Texas,” said Gay.

Nancy Curl has a faithful group of volunteers that meet at 9 a.m. on Fridays at the Fort Worth Botanic Garden Backyard Vegetable Garden. This 2012 intern project (now a MG project) has become a go-to place at the Botanic Garden for families. Saturday classes provide a variety of learning experiences targeting families. A new activity on the first Wednesday of each month has MGs partnering with Mike Warren and his children from Lena Pope Home.

See the bumper crop of sweet potatoes and Otto Witt giving an impromptu lesson about sweet potatoes to a visiting group.

The September field trip to McKinney's Meyer's Park, Chambersville Tree Farm and visit to the Crepe Myrtle Trails drew lots of our Master Gardener members. Our guides were members of the Collin County Master Gardeners Association who have earned an international MG award for research done at Meyer's Park.

**Patsy Miller,
TCMGA President**

“Already I can see a busy year ahead. Join us at the Christmas Luncheon!”

President's Message—cont'd

Thanks to all those who participated in Arlington's Eco-Fest. We had Master Gardeners educating the public at our booth, at well-attended talks and a special propagation table. Photos are at upper right.

A faithful group meets every Tuesday morning at the Community Demonstration Garden. It's a great way to get hours as there is always something to do at a variety of activity levels. Our sign is almost finished thanks to the work of Richard Kurth, Pat Higgins, Dianne Sterling and Bill Vandever.

Garden Lead Bill Vandever reports that 2013 has been a wonderful year for the garden: "new bathroom, new pavilion and walkway, plus the new container garden thanks to the 2013 class of great interns."

Remember, you can buy a paver (or more) to honor a family member or friend, express yourself with a favorite saying or life message or just your name. The form is on the website or at the monthly meeting.

I'm looking forward to working with our 2014 officers. Already I can see a busy year ahead. Join us at the Christmas Luncheon and installation of officers on Thursday, December 5, at the Woman's Club of Fort Worth. It's a beautiful setting – and MGs have helped with the gardens. Tickets are now on sale. See Eleanor Tuck.

Mark February 8 on your calendar for the regional conference on tomatoes. Get involved in the planning sessions. We have already lined up the speakers – and they literally wrote the book on growing tomatoes in Texas.

See you on November 7.

Patsy Miller
TCMGA President

TCMGA General Meeting—October 2013

President Patsy Miller called the business meeting to order at 10:45 a.m. and welcomed the more than 220 in attendance, including visitors, interns, and certified master gardeners. President Miller, and those present, enthusiastically recognized Kim Freeman who was in attendance after many months of recuperation from a vehicle accident. A quorum was certified.

The minutes of the September meeting were approved as published in the newsletter.

Executive Board

Taddie Hamilton, First Vice President programs, announced that the November meeting morning speaker would be Trip Smith, from the Conservation Greenhouse of the Botanic Gardens, who will talk on propagating Poinsettias. The afternoon speaker will be Dotty Woodson, from the Texas AgriLife Research and Extension Urban Solutions Center, who will talk about cultivating Orchids. Dotty is an owner of D and B Orchids.

The December 5 Holiday Luncheon will be at the Fort Worth Woman's Club, at a cost of \$20 each. Pre-paid reservations are being taken now.

Hamilton further reminded members to complete and return the Interest Survey and Volunteer Sign-up which is available at the sign-in table.

Linda Hawkins, Ways and Means, reminded that spring bulbs were available for sale, as are small bottles of liquid fertilizer @ \$5 and worm castings @ \$25.00 per bag. Hawkins shared that there were a few bags of fertilizer available. Roses are available for pick up at the Community Garden for one hour after this meeting. Today is the last day to purchase garden gear until January.

In November we will have vendor tables.

Steve Chaney, CEA, announced that we were still in need of a Speakers Bureau chair and a Junior Master Gardener chair.

Ginger Bason, President Texas MGA, announced that the state MG conference is October 17-19 in McAllen.

The first payment for the January 10-17, 2014 Cuernavaca trip is due October 4. There will also be a trip to Cuernavaca leaving June 13, 2014.

Bason reminded that the Garden Conservancy tour is Sunday October 12, and volunteers are still needed. Volunteer docents will receive free admission to all gardens.

Pam Braak, Treasurer presented the September financial statement showing

Treasurer's Report

For Month Ended
September 30, 2013

Cash, Beginning 9/1/2013	\$27,692.31
Deposits during month	\$8,548.69
Checks during month	<u>\$3,161.24</u>
Cash, Ending 9/30/2013	\$33,079.76

There were no questions and the report was filed.

Committee Reports

Susan Stanek, Nominating Committee, introduced the proposed 2014 slate of officers, asked for nominations from the floor, and explained the voting procedure. The election process was turned over to Taddie Hamilton. Having no nominations from the floor, the following were elected for 2014:

President: [Patsy Miller](#)

1st Vice President, Programs:

[Marianne Levine](#)

2nd Vice President, Ways & Means:

[Marilyn Satterfield](#)

Secretary: [Theresa Thomas](#)

Treasurer: [Starr Krottinger](#).

Donna Fry, Raffle Chair, announced three raffle items, which were a Weed Eater, 2 beautiful concrete leaves, and a “Worm Hotel,” or earth-worm bin.

Carol Lally, Time Keeping, explained the online timekeeping system that will go into effect November 1. MGs will track their own hours and record mileage, rather than drive time.

Announcements

- Today is the Intern Container Garden Open House & plant sale.
- Oct. 5, BRIT Harvest Festival. Thank you to those that volunteered.
- Oct. 22, 6:30 p.m. Katey Rudd, Community Garden Coordinator, Tarrant Area Food Bank, Ridglea Christian Church, 6720 W. Elizabeth Lane 76116. Learning Garden (to be) site.

Rudd, would also like to have a gardening mentor for Refugee Services clients
- Nov. 26, Grapevine Garden Club Fundraiser-Neil Sperry speaker
- Feb. 8, 2014 Regional Conference on Tomatoes
- Feb. 21-23, Fort Worth Home & Garden Show
- October and November education classes and tours of the Perennial and Trial Gardens, are listed on the bulletin board.
- 2014 dues are due **NOW**, photos for the directory are being taken today.
- Marianne Levine asked for volunteer dental hygienist and a nutritionist for a project she is involved with.

Old business

None.

New Business

None.

Door Prizes were distributed and, with no further business, the meeting adjourned at 11:40 am.

Respectfully Submitted

for Donna Morris

Birth Flowers and Their Meaning

November's birth flower is the Chrysanthemum (mum). There are both annual and perennial chrysanthemums.

The meaning of the mum is "with love and cheerfulness."

The hidden message of the mum during the Victorian era was "You are a wonderful friend."

Bird Month flower information attained from www.birthdaygems.org/

Pssst, wanna hear a joke?

From No-Dig-Gardening.blogspot.com

Name that Plant?

Skill: Intermediate

Description:

I am a deciduous tree I am on the small side, I grow to about 15-20 feet. But don't let my size fool you, I am tough! I like hot arid conditions and can thrive on minimal water. My long narrow leaves resemble another type of tree that weeps. I bloom in late spring. My blooms are trumpet-shaped, sweetly fragrant, and range from light pink to light violet, rarely white or red.

What am I?

Answer: Revealed next month.

THE BUZZ ON BUGS

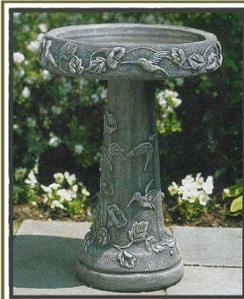

The Fall Migration

(September - November). This figure is an interpretation of the routes taken by Monarchs during the Fall migration. The pathways are based on tag recoveries and observations of Migrating Monarchs. This graphic, together with its Spring counterpart, also appears on our "Fall and Spring Migration Patterns" large format poster.

Keep your concrete and stone garden decorations from cracking in the winter.

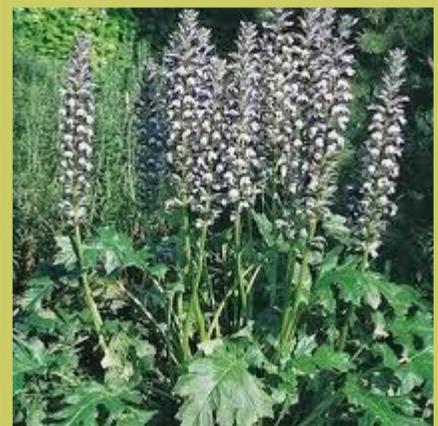

Porous concrete and stone statuary absorb water easily. When a snap freeze occurs, the water forms ice crystals inside the stone and breaks it apart. I've lost concrete birdbaths and garden statues, as well as clay pots, to this rare but damaging event. To prevent the damage, just paint a few coats of water-seal on the stone in the fall

before it gets too cold. The water-seal keeps the concrete from absorbing moisture and protects it from the freeze damage. The water-seal, like you use on decks, leaves a water-proof invisible coating on the surface once it dries. Do it every fall, because it wears off during the summer.

Tip contributed by Marilyn Sallee, TCMG

Answer to Last Month's "Name That Plant":

Bear's Breeches Plant

Ph

You Know You're a Master Gardener When:

You buy a bigger truck so that you can haul more mulch.

Do you have a "mystery plant? Write a "name that plant" paragraph and submit to jackieheidinger@verizon.net

Toni's Tips

Trees

Fall and winter are THE BEST times for planting trees. Even though the upper part of the tree may be dormant during the winter, the roots will continue to develop throughout the winter, and your new tree will be very well established before next summer's heat. Nurseries usually have great sales going on this time of year, too! If you need to transplant a tree, wait until it is completely dormant, usually January.

When planting trees, never add anything to the planting hole except the soil that came out of the hole. Amending the planting hole basically creates a "container" in the ground. The tree roots may not want to move beyond the nice cushy soil of the "container," and when the roots hit the native soil, they may circle back, eventually girdling the tree.

Dig a wide hole no deeper than the height of the root ball, and loosen or break up the sides of the hole with a shovel or rake. Take the tree out of the container, scrape the top couple inches of soil off the top of the root ball until you can see the flare of the trunk. (I just use a broom to brush the soil away). That is the top of the root ball. Break up any roots encircling the root ball. If the tree is really root bound, you may need to slice into the sides of the root ball with a shovel or knife.

Place the tree in the planting hole with the top of the root ball (the flare of the trunk) a couple inches ABOVE your soil grade. Back-fill around the root ball, once again, only with the soil that was dug out of the planting hole. Add root stimulator and water well to settle the soil.

Add compost to the TOP of the root ball area if needed, feathering it out to your surrounding soil grade. Then mulch around the tree, taking care to not cover the trunk flare. During the first year or two, you will need to give your tree supplemental water during hot, dry weather. Water slowly and deeply to encourage deep root development

NOTE: If you are planting a Shumard Red Oak or Chinese Pistachio, Neil Sperry highly recommends wrapping the trunk with tree wrap (see above) for two years to prevent sun scald and borer attack.

It is not necessary, however, to stake trees after planting, unless you have a high wind situation that may cause the tree to uproot before it is established. Trees will establish a stronger root system if not staked. If staking is necessary, be sure to remove all staking material after about one year.

Fall Annuals

For late fall/winter annual color, plant: pansies/violas, dianthus, dusty miller, cabbage/kale, curly parsley. They can handle just about anything our Texas winters dish out. Other color options are: snapdragons, alyssum, cyclamen, mustard, and Swiss chard, but they may need to be covered and protected if a hard freeze is expected.

Herbs and Vegetables

Cool season veggies like carrots, radish, spinach, and turnips can be planted now. Click for a complete fall vegetable planting guide for North Texas, go to: <http://aggie-horticulture.tamu.edu/archives/parsons/fallgarden/falldirect.html>

Bulbs

Did you order spring blooming bulbs from TCMGA? We can pick them up at the November meeting! Plant bulbs in a hole 3 times the height of the bulb. *Daffodils*, do not need pre-chilling and can be planted anytime after October 1st and through mid-January. Several good varieties of daffodils are: Ice Follies, Carlton, Fortune, Golden Dawn, and Grand Primo. Also try Spanish bluebells, Byzantine gladiolus, leucojum, species tulips, petticoats, fall crocus, and lycoris (red spider lilies). *Tulips*, *Hyacinth*, and *Crocus* need to be pre-chilled prior to planting. To pre-chill bulbs, store the bulbs in the refrigerator at 45°F for 45 to 60 days; then plant in late December, early January, when soil temperatures reach 45-50°F.

EDUCATION— cont'd

Save the Dates--Urban Farming Options

Ever thought of going in to business growing vegetables, fruits, nuts or other horticultural crops? Want to diversify your agricultural production?

Texas A&M AgriLife Extension Service –Tarrant County invites you to participate in one or more of six webinars plus hands-on activities and tours, addressing the following topics for the small-acreage producer:

<p>Aquaponics: Principles and Practices February 20, 2014</p> 	<p>Composting for the Small Acreage Producer April 24, 2014</p> 	<p>Grafting Vegetables: Principles and Practices June 19, 2014</p> 
<p>Practical Weed Control August 21, 2014</p> 	<p>Food Safety for the Small Acreage Producer October 16, 2014</p> 	<p>Business Planning December 11, 2014</p> 

The goal of the program is to assist producers in evaluating diversification strategies and income opportunities from the production of small acreage horticultural crops.

Bring your questions. A Q/A session is scheduled at the end of each webinar, and there will be time for discussion and networking with fellow producers.

Programs will be held at the Tarrant Plaza Building, 200 Taylor, Fort Worth Room, Fort Worth, Texas, 76102 and on site at various locations.

2013 TCMGA Meeting Programs

TCMGA Program—The Color of Christmas – Poinsettias and Orchids

Trip Smith, poinsettia grower and creator of poinsettia trees, will share the production of thousands of poinsettias which must be ready by December 1 each year. The process is fascinating and must be carefully timed to produce the beautiful plants that grace the DBM Garden Center each year and serve as gifts for hundreds of volunteers in the Fort Worth Botanic Garden.

Trip has Horticultural BS and MA degrees from Texas A & M along with years of experience as a pecan and fruit orchardist, vegetable gardener and bee keeper. He is also the curator of the Conservation Greenhouse and Orchid Collection at the Fort Worth Botanic Garden.

In the afternoon we are pleased to have Bill Mastin, the President of the Fort Worth Orchid Society teach us how to care for orchids. Bill will show us how to repot and care for the most beautiful and delicate plants in our homes.

See you there!

It's Beginning to Look a Lot Like Christmas!

The Master Gardener Holiday Luncheon and Awards ceremony will be held on Thursday, December 5, 2013, at 10:30 A.M. at The Woman's Club of Fort Worth. The beautiful buildings at 1316 Pennsylvania will be the site of the luncheon. Please park in the lot off Ballinger Street and enter through the Memorial Garden. Lunch will be served in Anna Shelton Hall. The Awards Committee is planning lots of fun awards and, of course, the Master Gardener of the Year!

The price is \$20. Please make your reservations at the table at the meeting with cash or check! Eleanor Tuck will accept reservations until December 1. You don't want to miss this lovely day!

Taddie Hamilton
1st Vice President

Vendors will be at the November TCMGA meeting so there won't be an exchange table of magazines, plants and seeds. They will return in January!
